

Drug dispensing tool additional requirements

1. Patients will be required to check out their orders before delivery. Each payment will have a unique payment code, the delivery cost and the receipt code.
2. All deliveries will have unique delivery codes to identify them. Only one delivery can be made for each check out.
3. For all login requests, either a patient, a doctor or even a contractor, they'll be required to use their SSN and a pre-set password.
- 4.
